Contributors To This Issue

James J. Ferrigan, III, a former vice president of the North American Vexillological Association (NAVA), is a walking encyclopedia of flag knowledge. His “The Evolution and Adoption of the Rainbow Flag” was published in The Flag Bulletin 28 (1989): 116–22. He is currently employed at The Flag Store in Sonoma, California, and won the William Driver Award in 1984 at NAVA 18 in Vancouver, British Columbia, for his paper “A Flag Incident in San Francisco.”

Alistair B. Fraser won the William Driver Award in 1986 at NAVA 20 in Trenton, New Jersey, for his paper “Chadwick and the Canadian Red Ensign.” A member of the faculty of the Pennsylvania State University, he resides in Lemont, Pennsylvania, in the shadow of Mount Nittany.

John Gámez currently chairs the NAVA nominating committee, serves on the membership committee, and is a frequent contributor to NAVA News. When not busy pursuing higher education in San Antonio, Texas, he enjoys flag designing and the study of history.

Kevin Harrington has served as the recording secretary of NAVA and is the current president of the Canadian Flag Association. He is the creator and editor of Flagscan, the journal of the Canadian Flag Association, and won the William Driver Award in 1989 at NAVA 23 in Dallas, Texas, for his paper “Names and Nicknames on Flags.” He hails from Scarborough, Ontario.

Don Healy won the William Driver Award in 1988 at NAVA 22 in Portsmouth, New Hampshire, for his paper “Evolutionary Vexillology.” A resident of Trenton, New Jersey, he served as president of NAVA from 1989 to 1991, and his articles have been published in NAVA News, Flagscan, Crux Australis, and The Flag Bulletin.

Anne M. Platoff won the William Driver Award in 1992 at NAVA 26 in San Antonio, Texas, for her paper “Where No Flag has Gone Before: Political and Technical Aspects of Placing a Flag on the Moon.” Her detailed research on Kansas flags had impressed earlier NAVA audiences. She is employed as a research librarian for the New Initiatives Office at Johnson Space Center. A model student, she continues to accumulate graduate degrees.
Colophon

This issue of Ṣoṣẹ́ Ọ̀rọ̀ Ọ̀rọ̀: A Journal of Vexillology was typeset in Monotype Ehrhardt and Monotype Colmcille using \LaTeX, a macro package for the \TeX typesetting system. Final output was created on a Linotronic 530 imagesetter at 1693 dots-per-inch. With the exception of “Raven, Terror of the Land” on the cover and page two, all figures and photographs were produced in a more traditional fashion.

The journal is printed on 60 pound Glatfelter Supple Opaque acid-free, recycled paper. All printing and binding was done by Thomson – Shore, Inc. in Dexter, Michigan.
